

Program9: Insert and Remove Elements in Queue

```
package mounika9;
import java.util.*;

public class QueueExample
{
    public static void main(String[] args)
    {
        Queue<String> locationsQueue = new LinkedList<>();
        locationsQueue.add("foreign");
        locationsQueue.add("Patna");
        locationsQueue.add("Delhi");
        locationsQueue.add("Gurgaon");
        locationsQueue.add("Noida");
        System.out.println("Queue is : " + locationsQueue);
        locationsQueue.remove();
        System.out.println("Head of Queue : " +
        locationsQueue);
        System.out.println("Size of Queue : " +
        locationsQueue.size());
    }
}
```
